Hardware Supplied per Point

- (1) Wilcoxon 784A Accelerometer
- (1) SI-3106-88760/30-BC 30' Cable with Mil Spec Connector

Installation Assumptions

Base System starts at 32 Points.
Included in 32 points

- Surface preparation of mounting areas.
- Installation of transducers, conduit, junction boxes.
- Conduit - 150 feet 3/4 Rigid with all mounting accessories.
- Flexible Conduit - 100 feet with necessary fittings.
- Terminate field wiring, and label all cable ends.

End user must provide easy access to installation points.

System must be installed during a single shutdown.

If installation requires more mounting hardware than included,
end user may provide additional installation accessories or
purchase the accessories from SI-TES.

Number of installation points increment by 4.
Included in 4 points:

- Installation of hardware needed for 4 additional points.
- Additional 20 feet of conduit and accessories.
- Additional 10 feet of flexible conduit and accessories.

Installations with fewer than 32 points can be quoted on an individual basis.
